Vax Facts

- Anyone who gets COVID-19 can become seriously ill or have long-term effects (long COVID). The COVID-19 vaccines are the best way to protect yourself and others.
- The vaccine is safe and effective.
- You can get vaccinated if you're pregnant, breastfeeding, or you're trying for a baby.
- The COVID-19 vaccines do not contain egg or animal products.
- You need two doses and a booster dose for strong and long-lasting protection.
- The second dose is given from eight weeks after the first.
- The booster dose is given 182 days or 6 months after the second dose.
- Anyone aged 12-17 who is in good health will currently only receive one dose.
- People aged 12 –15 who are at increased risk from Covid-19 will receive two doses.
- *People aged 12 and over and who had a suppressed immune system at the time of their first or second dose should have a third primary dose, before their booster dose.
